1. Manage Basic Information

1.1 Login Interface

Please open browser and input <http://www.farknowgps.com> to load the page as below.

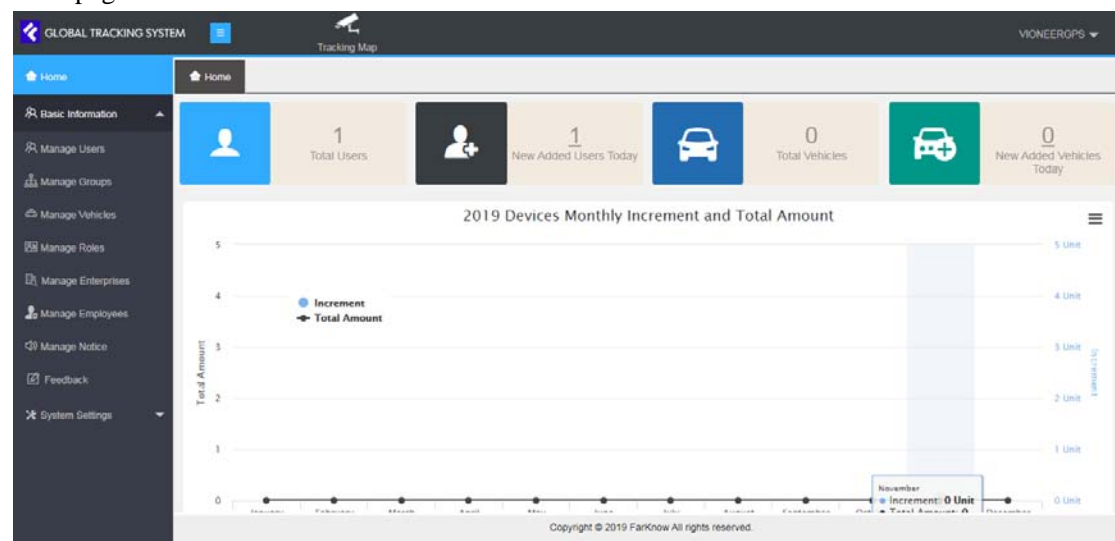

1.11 You can choose language from the top right language option column.

1.12 You can click *Mobile* to wap login interface.

1.13 You can download *FarKnow APP* from apple store or google play.

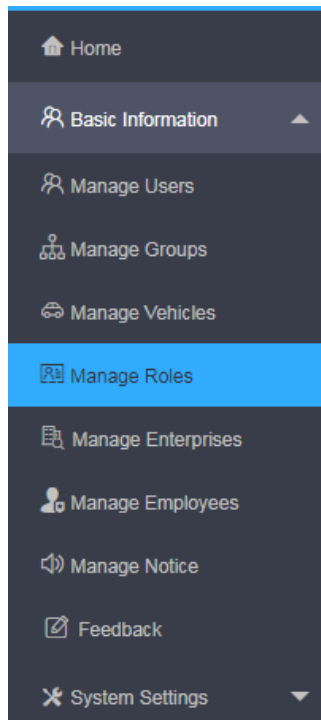

1.14 Please enter username and password in login frame, if verify successfully, it will load to homepage as below.

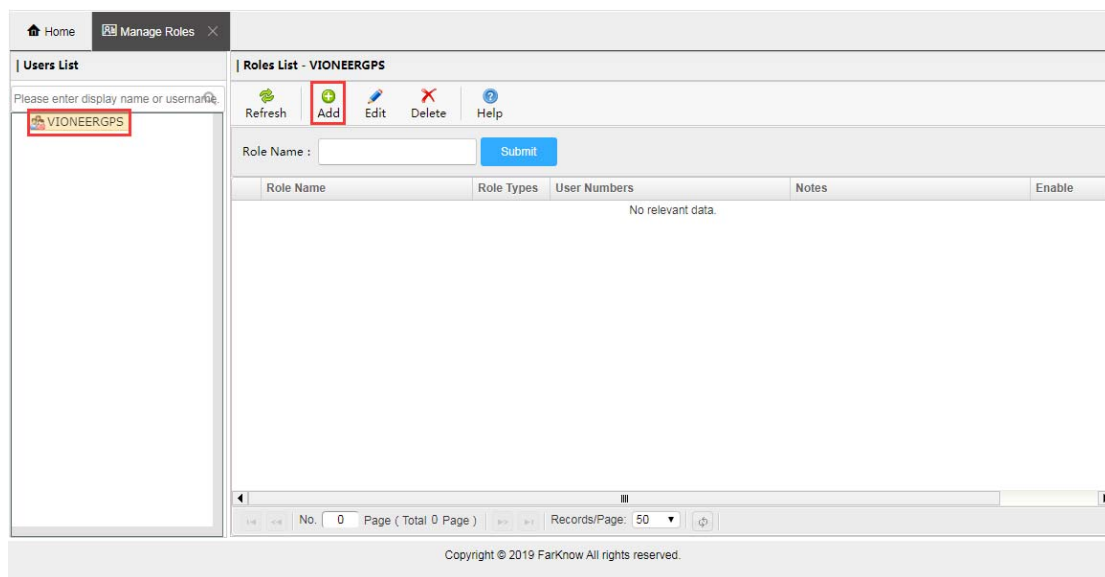

1.2 Manage Roles

Before you creating users, you should define the user roles. For example, if you want to create a distributor user account and an end user account, the features in these two accounts should be different. The main use of roles is to differentiate the features among the users

After login by admin account, you would see menu as below image, click *Manage Roles*

Select the user in the users list and click add button.

When pop up the frame, please fill the *Role Name* column, select *yes* in *Enable* column and tick the features in *System Module* list, and click *Submit* button.

Add Role

Role Name [*] :

Enable :

Notes :

System Module

1.5 Manage Vehicles

Besides creating *Vehicles* in *My Vehicles* of *Manage Users*, you can click the *Manage Vehicles* in the main menu to create.

Click *Add* in *Manage Vehicles* frame.

The screenshot shows the 'Manage Vehicles' interface. At the top, there's a breadcrumb 'Home > Manage Vehicles'. Below it is a toolbar with icons for Refresh, Add (highlighted with a red box), Edit, Delete, Delete Copy, Import, Export, and Help. Under the toolbar are two dropdown menus for 'Select User' and 'Select Group', both set to '==Please select=='. To the right are search fields for 'Keywords' (with placeholder 'Plate No./Device ID/SIM No.'), 'Start Time', and 'End Time'. Below these is a table with columns: Plate No., Device ID, SIM No., Users, Groups, Driver, Driver Contact, Owner, Owner Contact, and Service. The table is currently empty, with the text 'No relevant data.' centered. At the bottom, there's a pagination bar showing 'No. 0', 'Page (Total 0 Page)', and 'Records/Page: 50'. The footer contains the text 'Copyright © 2019 FarKnow All rights reserved.'

It will pop up a frame as below, please fill column with wild symbol marked in the *Basic Information* frame such as *Plate No.*, *Device ID*(please fill this column according to the serial number assigned from supplier), *SIM No.*

If you are creating information for the device like *TK103* or *GT06* which need *IMEI* to identify data in system, please fill the *IMEI* column also.

Select the user in the *Users* column, the vehicle created will be under this user.

Select the group in the *Groups* column, beside the *Groups* column, you can find the add button, you can create group from here also.

Select the *Device Supplier* and *Device Types*, if you are not clear about the supplier and type, please choose others.

Select the *Service Expiring Date*.

Selec the *Vehicle Types*.

2.4 History Playback

You can click the *Playback* button in *Vehicles List* or click the *History Playback* in the top menu.

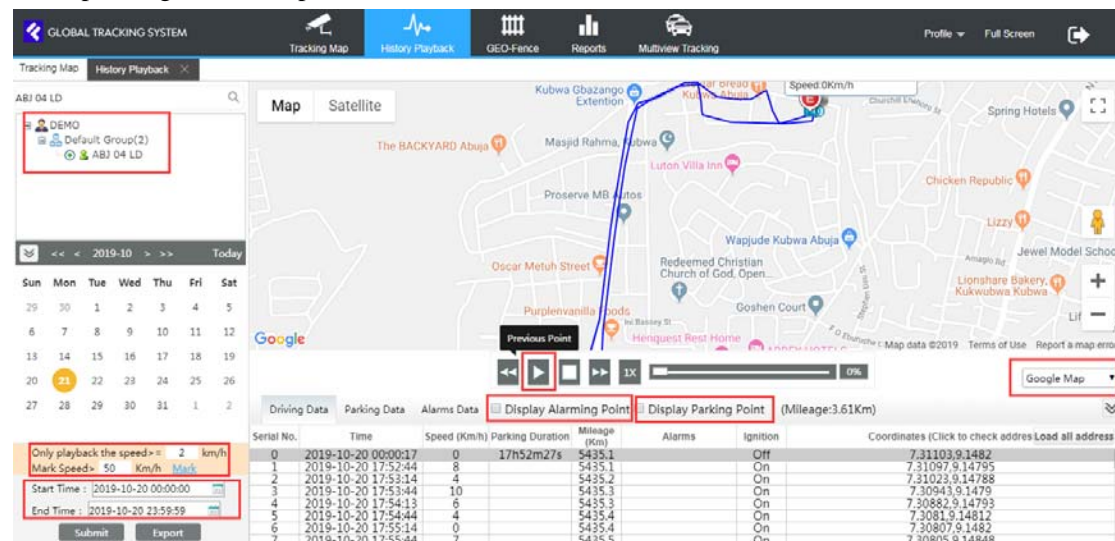

It will direct you to the *History Playback* interface.

Please select the vehicle in the list, fill the parameters below the list, select the time period, click submit, it will loading the history data, and you can click play button to playback.

Beside the playback progress bar, there is switch map option.

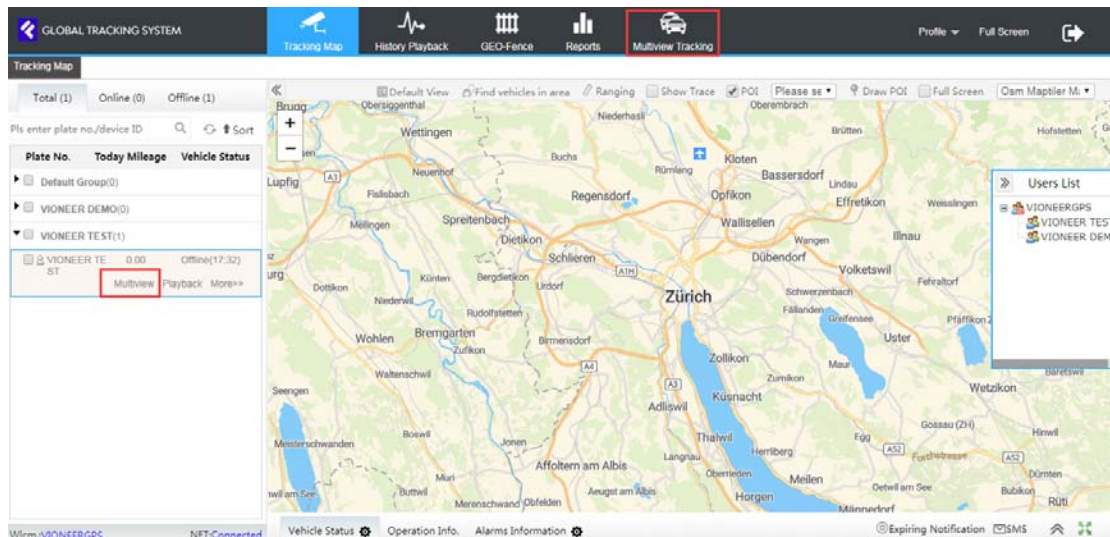

Below the playback progress bar, you can filtrate the data by *Driving Data*, *Parking Data*, and *Alarms Data* option.

When you tick the *Display Alarming Point*, or *Display Parking Point*, it will display the corresponding icon in map.

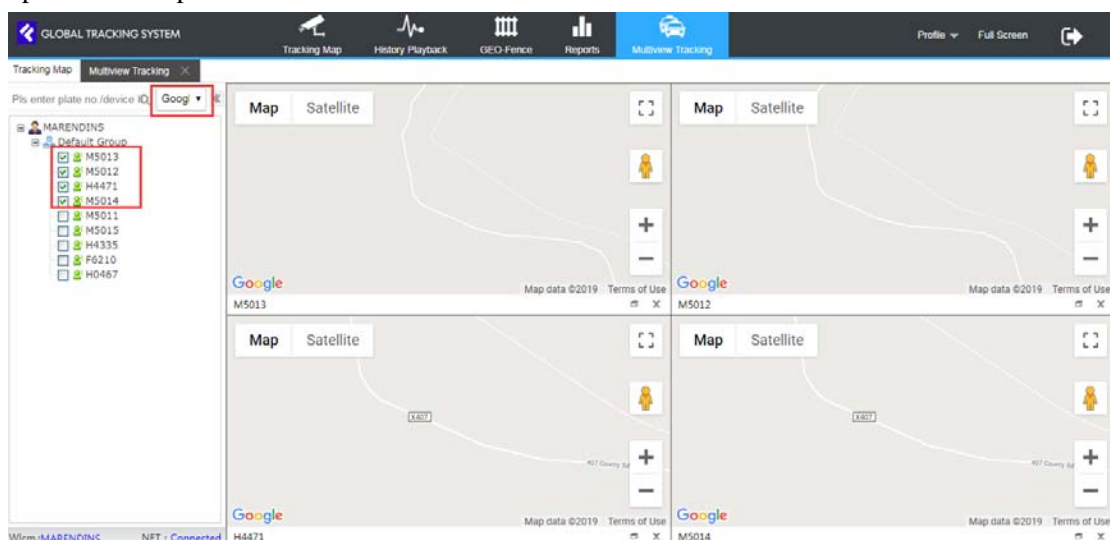

2.5 Multiview Tracking

You can click the *Multiview* button in *Vehicles List* or click the *Multiview Tracking* in the top menu.

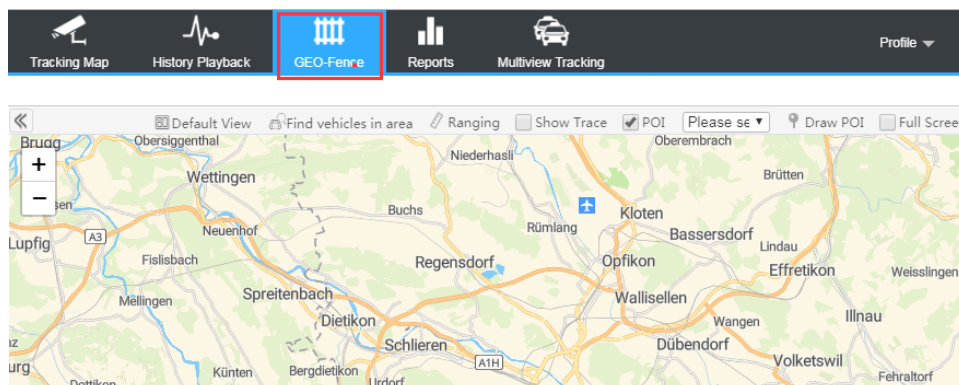

It will direct you to the *Multiview Tracking* interface.

Please select the vehicles in the left list, and it will display in the small windows in right frame, then you can track the selected vehicles at the same time. The maximum numbers of small windows would be four in *Multiview Tracking* interface, and you can switch map from the map option at the top of left list.

2.6 GEO-fences

You can click *GEO-Fence* button in the top menu.

It will direct you to the *GEO-Fence* interface.

There is *Tool Bar* at the top of map, the features are listed below:

Circle: you can draw circle in the map based on a point you click in map.

Rectangle: you can draw rectangle in the map based on two points you click in map.

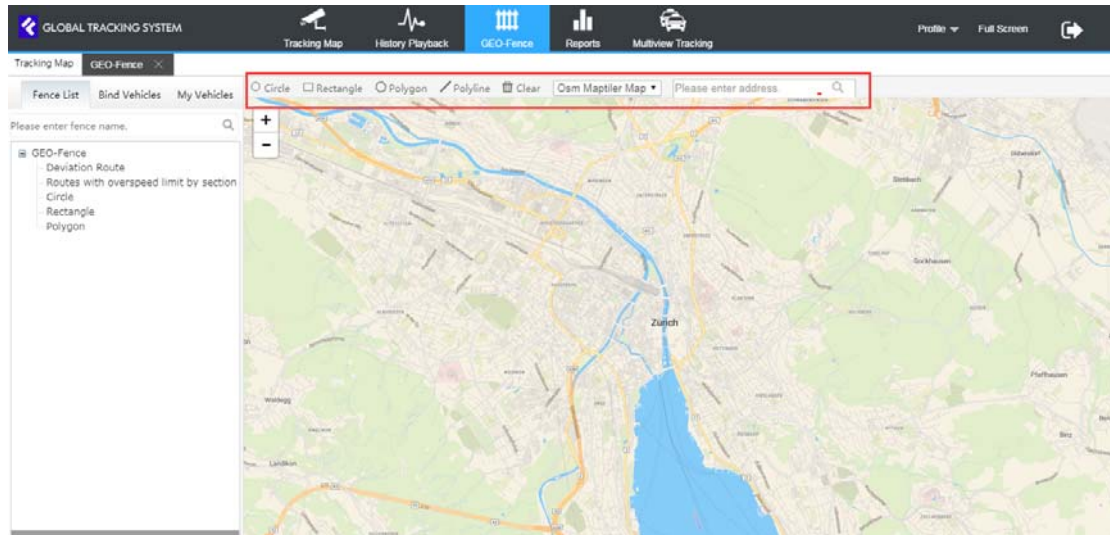

Polygon: you can draw polygon in the map based on multi-points you click in map.

Polyline: you can draw polyline in the map based on multi-points you click in map.

Clear: you can clear the fences you have drawn in map

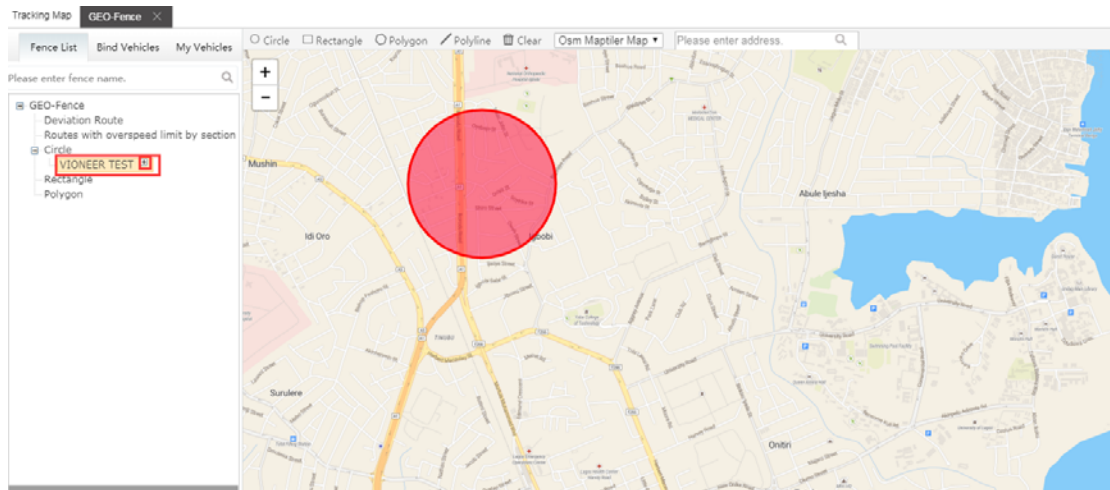

Map Option: switch maps

Search Column: you can search out the area that you want to create the fence.

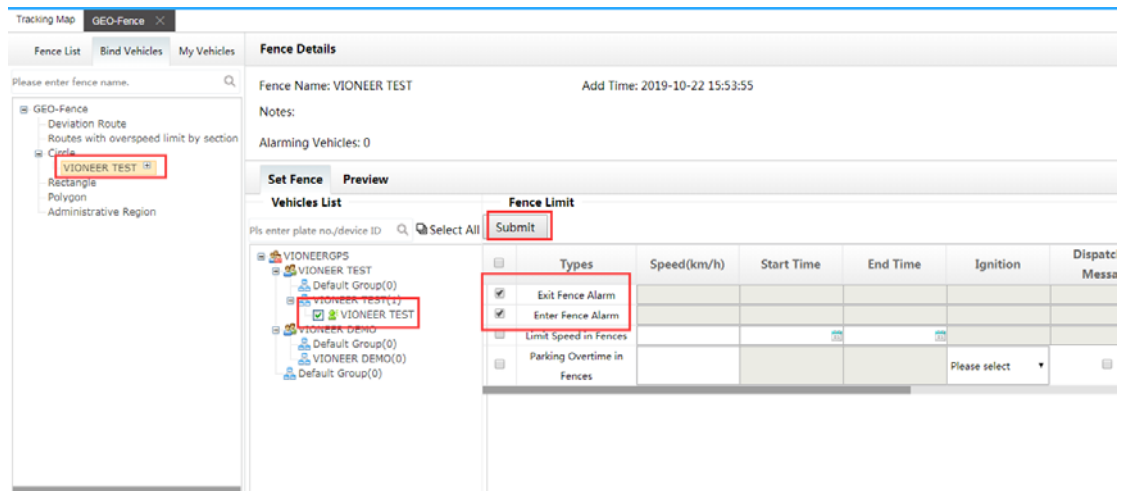

Let's use *Circle* feature to create a fence. When you search out the area, click circle, and draw in the map, it will pop up a frame as below. Please fill *Fence Name* column and click *Submit*.

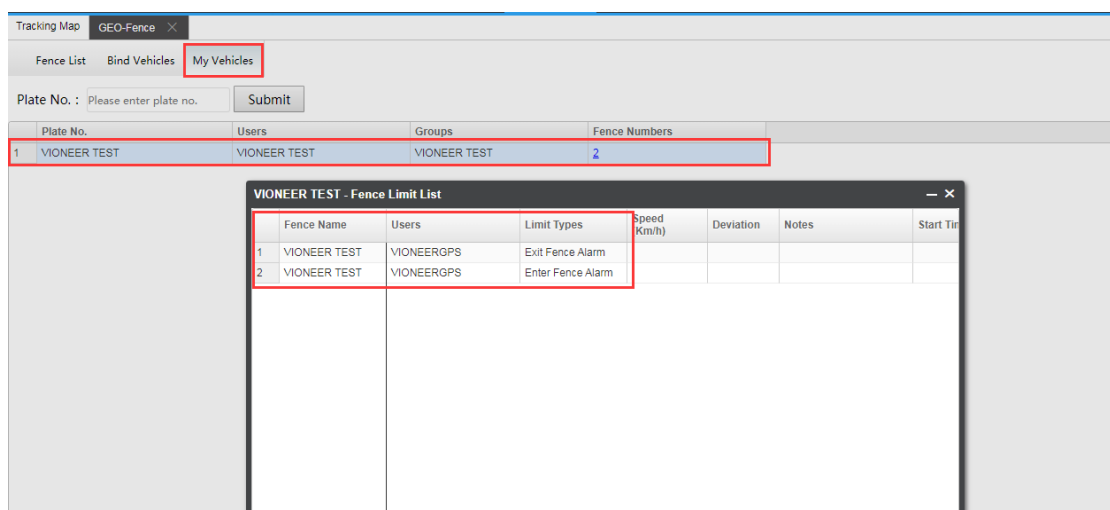

If you created successfully, it will display under the *Circle* category in left list. When you click, it will display on the map in right side. If you want to delete it, you can click the small *Plus* button at the right top corner of the fence name.

After created fence, please click *Bind Vehicles*. It will direct you to the *Bind Vehicles* interface. Please select the fence, select the vehicle is the *Vehicles List*, select the alarm types in *Fence Limit*, and at last click *Submit*.

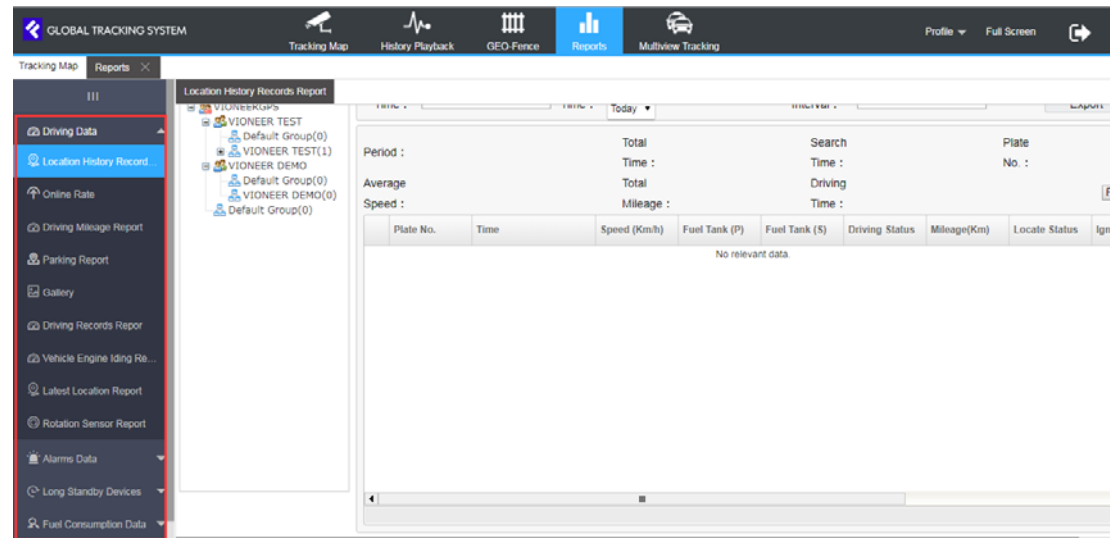

If operate successfully, you can check created information in *My Vehicles* as below.

2.7 Reports

You can click *Reports* button in the top menu and check the various types of reports in this interface.

If you have more questions, please send mail to info@vioneer.cn and request technical support.
